

IHS Energy

# Global Exploration & Production Service (GEPS)

A worldwide picture of E&P activity  
specifically tailored to your needs

**The Source**  
for Critical Information and Insight™

Whether screening for new opportunities, monitoring competition, analysing activity or tracking how field life is being prolonged, GEPS provides accurate up to date information tailored to your specific requirements.

The GEPS suite of editorial products supplies you with current, historical and planned activity in the worldwide E&P sector. Primarily designed as dynamic, online reports, IHS information is the fastest and most accurate reporting service available. GEPS is established as the market leader in the provision of definitive, up to date, accurate and detailed information.

IHS has an unparalleled communication network with operators, national oil companies, government agencies and service companies worldwide. With 23 technical teams positioned around the world, proficiencies in 35 languages and hundreds of daily contacts, IHS covers petroleum activity in nearly 200 countries.

Online GEPS Reports provide you with the most accurate and up to date E&P activity information globally

"GEPS provides an excellent 'screening tool' for initial consideration of each new regional opportunity as it develops. Nothing else provides such a comprehensive mix of news, analysis and maps within a single source."

Dan Whalling, Area Manager-Africa, PGS Exploration

## GEPS Reports

IHS GEPS Reports are used throughout the world by professionals interested in detailed E&P activity.

GEPS Reports allow you to identify and explore unique opportunities, and give you the ability to monitor and evaluate activity worldwide, so that you can maintain a competitive advantage.

The reports are continually updated, providing rapid access to key information, by region, country or company. Topics covered by GEPS Reports include:

- General Issues
- Petroleum Rights
- Legislation
- Geophysical Activity
- Exploratory Drilling
- Field Development
- Production and Reserves
- Downstream Activity

The dynamically updated online reporting provides global coverage, by country, to current and historical information covering the last 12 months.

Powerful search engines, coupled with your own personalised report generator, enable you to specify and save tailored reports on the topics and regions of your choice. This information can then be delivered directly to your desktop, and provides you with an up to date report whenever you log on.

This unique service is built on an unrivalled foundation of knowledge, experience and understanding of the industry and is written by E&P professionals, located strategically around the world. GEPS Reports are supported by IHS Technical Teams and the world's most extensive E&P database.

In addition to the GEPS Reports, IHS offers the following services as part of a complete solution.

### International Oil Letter (IOL)

The International Oil Letter delivers to E&P professionals a concise weekly overview and analysis of E&P activity worldwide. The speed, coverage and content of the information saves time and money. The report is available both as an e-mailed PDF and as part of the powerful IHS online service.

All aspects of the E&P industry are covered from legislation, acreage offers and seismic acquisitions to exploratory drilling and development-to-production activity as well as:

- Weekly summary and analysis of global E&P activity
- Weekly oil price discussions
- Weekly global E&P activity and statistics
- Quarterly international open-acreage inventory
- Quarterly industry reviews

### Daily Exploration Alert

Daily Exploration Alert provides the fastest daily breaking news service on the latest E&P activity. A favourite with oil & gas professionals who cannot afford the time to scan other industry news, the Daily Exploration Alert provides a dynamic, incremental online service plus e-mail alerts. Information included in the daily updates:

- Oil Pricing (weekly summary)
- Acreage Offers
- Petroleum Rights
- Exploration Drilling
- Field Development
- Production and Reserves

"IHS information and products are a vital part of my daily workflow. Tasks that previously took days to complete can now be done in a few hours."

Olav Nipen, Head Geophysicist  
Exploration & Production International, Norsk Hydro

Updated monthly, the Web-based report presents historical, monthly and annual production statistics, together with forecasts and up to date analytical commentary for the world's major oil-producing regions, currently covering nearly 60 countries with production exceeding 50,000 BOPD.

This high-level screening and reference tool saves thousands of man-hours typically spent in researching and collating global data, with the additional benefit of informed editorial comment based on IHS unique insights into production-related issues drawn from regional experts.

### Easy to use

- Save time by creating your own personalised GEPS Report based on your preferred countries and topic selection, which then automatically collates new and updated articles and alerts you via e-mail
- GEPS Reports are structured so you can easily subscribe to as many, or as few, of the countries or regions as required
- View current and historical information

### Consultancy when you need it

IHS provides you access to the E&P experts behind the GEPS services. This service ensures your decisions are made with the help and continuing support of experienced international experts equipped with the very latest oil industry information.

### Key Users

- Oil & Gas Companies
- National Oil Companies
- Consultants
- Service Companies
- Governments
